

LITHIUM SERIES® Electric Torque Tool

The LITHIUM SERIES is the ultimate solution for portability and convenience on industrial bolting jobs. With the world's first 36-volt industrial battery system, these tools are ready for heavy industrial use. The lightweight design and dual speed capability make this system the go-to choice for industrial maintenance and production environments worldwide.

INDUSTRIAL-GRADE POWER

The LITHIUM SERIES was designed from the ground up using aerospace-grade materials to provide a compact design with industrial durability and power. The metal frame cut from a solid piece of aluminum alloy protects the tool from damage on industrial jobs. The 36-volt battery gives you the power to get through the toughest bolted joints.

DUAL SPEED BOLTING

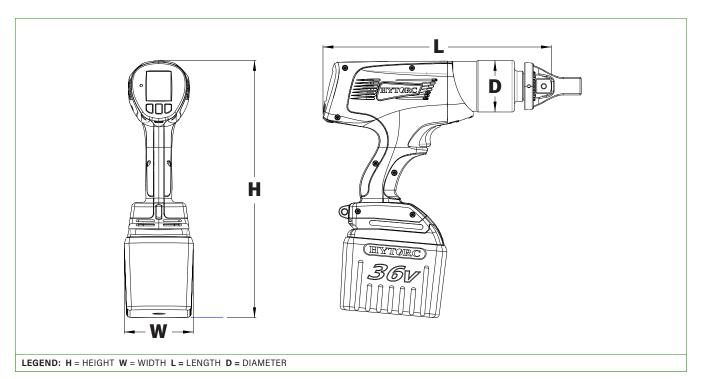

With a simple switch, the LITHIUM SERIES goes from high speed rundown mode to accurate final torque mode, eliminating the need for multiple systems on a job. The precision machined gearbox provides constant power without the vibration and noise found in impact guns. Adjust the power through the digital readout on the back of the gun to finetune the torque output for any job.

DATA RECORDING

Built-in data recording capability allows the user to maintain a log of all completed bolting jobs. For improved quality control and accountability, the information can be saved to a PC or tablet to provide a permanent record of the work performed.
